PROFESSIONAL SUMMARY

Aspiring Junior Frontend Developer with hands-on experience building real-world web applications using React and modern JavaScript. Skilled in developing responsive user interfaces, reusable and modular components, and interactive dashboards, with practical experience managing application state, integrating REST APIs, and using Git/GitHub for version control. Comfortable working across the frontend development lifecycle, from component architecture to UI/UX implementation, with a strong focus on writing clean, maintainable code. A fast learner who is continuously building technical skills through independent projects, and eager to contribute to a team as a Frontend Developer, React Developer, or Web Developer.

TECHNICAL SKILLS

JavaScript (ES6+), React.js, TypeScript, Tailwind CSS, REST APIs, Responsive Web Design, UI/UX Implementation, Component-Based Architecture, State Management, Framer Motion, Lucide React, Supabase

Development Tools: Visual Studio Code, Git, GitHub, Vite, Supabase

PROJECTS

PrismView — Personal Finance Dashboard • *Completed*

A modern personal finance dashboard built to help users manage and visualize their financial activity.

- Developed the application using React and modern frontend technologies.
- Built reusable and modular React components for a maintainable, scalable codebase.
- Implemented transaction management functionality, including creating, editing, and deleting transactions.
- Implemented search and filtering functionality for transaction data.
- Used Context API for application-wide state management.
- Created dedicated dashboard sections for transactions, budgets, goals, analytics, and reports.
- Focused on responsive layouts and modern UI/UX design.

Student App • *Completed*

A student-focused web application built to demonstrate practical React development and application architecture.

- Built the application using React with reusable, component-based UI.
- Implemented application state management to support core functionality.
- Developed a responsive, user-focused interface.
- Maintained a clean, maintainable code structure following modern frontend development practices.

Meridian — Web Application • *Currently in Development*

An active project focused on building a modern, responsive web application.

- Currently developing the frontend using React with a component-based architecture.
- Implementing reusable UI components and application state management.
- Working on integration with backend services where applicable.
- Following a Git/GitHub-based development workflow with continuous feature development and improvement.

Personal Portfolio Website • *Completed*

A professional portfolio website built to showcase development projects, technical skills, and professional profile.

- Developed using React with a responsive, mobile-friendly layout.
- Built reusable components and implemented a modern, polished UI.
- Added interactive elements and animations to enhance user experience.
- Structured the project for clarity and professional presentation.

EDUCATION

Secondary School Education — Completed. Currently building practical software development experience through independent projects and continuous self-directed technical learning in frontend web development.

ADDITIONAL INFORMATION

Practical, project-based experience in frontend development in place of formal employment history, demonstrated through the projects above. Actively seeking Frontend Developer Internship, Junior Frontend Developer, Software Developer Internship, or Junior React Developer opportunities, and open to freelance web development work.
